Jorge Álvarez

Full Stack Developer

joralvmel@gmail.com — +34 667 206 535 — Madrid, Spain — github.com/joralvmel — linkedin.com/in/joralvmel

Professional Summary

Creative and results-oriented Full Stack Developer with a strong focus on React and frontend technologies. Experienced in building internal component libraries, developing new product POCs, and modernizing legacy systems. Passionate about crafting intuitive UIs and collaborating in agile teams.

Professional Experience

Software Developer Engineer *Solera — October 2022 – Present*

- Maintained and enhanced Qapter Claims and Omnitracs systems; modernized legacy applications using React and JavaScript
- Designed and built an internal React component library with TypeScript and React, improving consistency and reusability across teams
- Developed a fleet management POC and a full-stack fleet dashboard application, following Figma mockups
- Collaborated in agile teams with regular code reviews, ensuring high code quality standards

Technologies: JavaScript, TypeScript, React, Redux, Zustand, Tailwind CSS, HTML/CSS, Java, Node.js, Figma, Jira

Business Consultant *London Consulting Group — September 2021 – October 2022*

- Led process optimization projects across pharmaceuticals and manufacturing industries
- Built interactive Power BI dashboards and applied statistical analysis to drive data-based decision-making

Technologies: Microsoft PowerBI, Excel, Miro, Statistical Analysis

Education

Master's in Web Engineering *Universidad Politécnica de Madrid — 2024 – 2025*

Coursework: Front-End, Back-End, Mobile Development, Database Systems, Web Security

Bachelor's in Mechatronics Engineering *Tecnológico de Monterrey — 2016 – 2020*

Foundations in programming, system design, and cross-disciplinary engineering problem-solving

Projects

cocinIA github.com/joralvmel/cocinIA

- AI-powered mobile app for personalized recipe generation, weekly meal planning, smart shopping lists, and a digital pantry
- Integrated Gemini API for recipe creation adapted to user preferences, dietary restrictions, and available ingredients

Technologies: React Native, Expo, TypeScript, Zustand, TanStack Query, NativeWind, Supabase, Gemini API

Recipe Management Comparison github.com/joralvmel/recipe-management-comparison

- Full-stack recipe platform built in parallel with React and Angular for framework comparison, featuring auth, favorites, reviews, and a recipe catalog
- REST API with Swagger documentation and MongoDB integration; responsive UI with filtering and user-friendly navigation

Technologies: TypeScript, React, Angular, Node.js, MongoDB, Docker, GitHub

Technical Skills

Frontend:	React, React Native, Angular, Next.js, HTML5, CSS3/SCSS, Redux, Zustand, Tailwind CSS
Backend:	Node.js, Express.js, REST APIs, Java
Languages:	JavaScript, TypeScript, Java, Python, C++
Database:	MongoDB, Firebase, Supabase
Tools:	Git, GitHub, Bitbucket, Postman, Jira, Figma, VSCode
Spoken:	Spanish (Native), English (Fluent)
